A video library with vocational videos for all vocational skills and trades

## Courses

### Course: Cybersecurity Concepts ★

This course highlights the assets of citizens and SME that are harder to identify: their information and personal data.

Explains the most common threats to those important assets.  
Describes some Methodologies and tools to protect them.

Course options ▼

✓ Mark the course completed

#### INSTRUCTORS

#### INSTITUTION

APWG.EU - Barcelona, Spain

#### LEVEL

Beginner

#### CATEGORIES

Cybersecurity, End User Security, IT,  
System Security

#### LANGUAGE

English

#### Lesson 0

About the course

Continue

#### Lesson 1: Data Threats

Step 1.1: Distinguish between data and information (15min)

Continue

Step 1.2: Understand the terms cybercrime and hacking (10min)

Completed

A concise learning unit with texts, videos, images and other features.  
An easy tool for students and teachers.

## Trainings

### Training: CYBERSECURITY ★

Training options ▼

[+ Enroll and add to your workspace](#)

Computer and Networks security is a requirement imposed by regulations and for business continuity and sustainability also. Growing number of threats imposes improvement of IT knowledge with cybersecurity skills. This topic has 3 courses, addressing the needs identified by ECDL for: - Beginners, end users - Intermediate, IT professionals in general - Advanced, cybersecurity operators

#### Cyber Security Risk Assessments

##### Why carry out a cyber security risk assessment?

Risk assessment – the process of identifying, analysing and evaluating risk – is the only way to ensure that the cyber security controls you choose are appropriate to the risks your organisation faces.

Without a risk assessment to inform your cyber security choices, you could waste time, effort and resources – there is, after all, little point implementing measures to defend against events that are unlikely to occur or won't have much material impact on your organisation.

It is also possible that you will underestimate or overlook risks that could cause significant damage to your organisation. As the UK government's [Cyber security breaches survey 2017](#) noted, data breaches are "common even among businesses who do not consider cyber security to be a priority, or who may not think they are exposed to risk."

#### DESCRIPTION

Whatever your role, it's likely that you'll need to make a decision that involves an element of risk at some point. Risk is made up of two parts:

An online magazine for Vocational Education & Training (VET) with best practices, job profiles, latest developments and current debates.

### What does a cyber security risk assessment include?

A cyber security risk assessment identifies the various information assets that could be affected by a cyber attack (such as hardware, systems, laptops, customer data and intellectual property), and then identifies the various risks that could affect those assets.

A risk estimation and evaluation is usually performed, followed by the selection of controls to treat the identified risks. It is important to continually monitor and review the risk environment to detect any changes in the context of the organisation, and to maintain an overview of the complete risk management process.

## Admin Panel

The screenshot displays the ViVET Admin Panel interface. On the left is a dark sidebar with navigation links: Videos, All videos, Crawler, Queue, Trash, Other content, Categories, Institutions, Users, Bugs, Languages, Localization, Legal, and Stats. The main content area is titled 'Video crawler' and shows a message: 'Crawler found 245559 items. This is page 1 of 4912.' Below this is a 'Categories' section with a search bar and a list of categories. The 'Cybersecurity' category is expanded, showing 6 subcategories: End User Security, Infrastructure, Software, System Security, Research and Development, and Privacy and Data Protection. Each subcategory has a star icon, a 'Show subcategories' button with a count, and 'Edit' and 'Delete' icons.

An Admin Panel for teachers to track their students, evaluate them and follow their courses.

Two different targets •

**Students**

**Teachers**

## Students

- ✓ Labor market issues
- ✓ Youth unemployment
- ✓ Refugees

## Engagement

- ✓ Useful & User Friendly platform
- ✓ High quality content
- ✓ Certification

## Teachers

- ✓ Make trainings/courses/topics online
- ✓ Upload videos
- ✓ Translation content tool

## Engagement

- ✓ Useful & User Friendly platform
- ✓ Pool of students provided by ViVET

- ✓ Easy to use platform
- ✓ Video and course repository:
  - ✓ Specialised in vocational training
  - ✓ Evaluated and categorised videos
  - ✓ Evaluated courses by students
  - ✓ Categorised courses by topic and skills level by teachers
- ✓ Need to find long term funding
- ✓ Need to find place in the market: Vocational, Immigrants, in-house
