International cooperation to prevent, investigate and prosecute cybercrime using emerging technologies: challenges and opportunities

Version 13 April 2022

**Webinar jointly organised by the Council of Europe
and APWG.EU**

28 April 2022, 15.00-17.00 GMT, online

Outline

Background and justification

Cybercrime is a threat to human rights, democracy and the rule of law. Criminal justice authorities are confronted with a continuous increase in the scale and quantity of cybercrime and other offences involving electronic evidence, including those perpetrated through the use of emerging technologies. These can include the potential for offenders to weaponise new technologies, to use them to detect vulnerabilities or to automate attacks, or to seek to manipulate technologies such as artificial intelligence for criminal purposes.

The new and emerging technological tools available to cyber criminals introduce further exacerbate existing issues related to retaining and accessing electronic evidence, admissibility of electronic evidence, territoriality and jurisdiction, and international and public-private cooperation. As such, they present a significant challenge to the effective investigation and prosecution of cybercrime.

At the same time, new and emerging technologies offer powerful new tools to enhance the criminal justice response to cybercrime. This can include their use to improve cybersecurity, detect attacks, help identify and investigate offenders, and automate domestic and international cooperation.

As such, new technologies present both public and private sector actors with significant challenges and opportunities. Taking full advantage of their potential requires effective international cooperation – both public-public and public-private – to prevent, investigate and prosecute cybercrime using new technologies, while upholding international human rights and rule of law standards.

This webinar aims to highlight avenues for international collaboration to effectively combat cybercrime committed using emerging technologies and to harness the potential of these technologies to assist the work of criminal justice authorities, and provide a platform for exchange of best practices and resources.

The Council of Europe and the APWG (Anti-phishing Working Group), including the APWG.EU, have been collaborating for many years to strengthen the criminal justice response to cybercrime and raise awareness among relevant stakeholders and the public on related matters.

Objective

Carried out by the GLACY+ Project in cooperation with APWG.EU and with the support of the Octopus, CyberSouth, CyberEast and iPROCEEDS projects of the Council of Europe, the activity aims to:

- address the possible challenges and opportunities regarding international cooperation to prevent, investigate and prosecute cybercrime using emerging technologies;
- present and exchange best practices and resources on international private-public cooperation on cybercrime prevention and investigation using new technologies.

Expected outcome

At the end of the webinar, participants are expected to have:

- increased their knowledge of specific methods, best practices and real-life cases of international collaboration to prevent, investigate and prosecute cybercrime using new technologies;
- become aware of the types of support available through global capacity-building initiatives.

Participants

This webinar will be particularly useful for policymakers responsible for cybercrime policies and legislation; representatives in charge of cooperation with LEAs; criminal justice practitioners; and representatives of the private sector.

Administrative arrangements

The event will take place online via Bluejeans Events platform. The webinar will be held in English and the discussion will be recorded.

Please register [here](#) before 26 April 2022, 13h00 GMT.

Draft Agenda

TIME (GMT)	28 April 2022
15h00	<p>Introductory remarks and workshop goals</p> <p>Martha STICKINGS, Programme Manager, Council of Europe Cybercrime Programme Office (C-PROC)</p>
15h10	<p>Roundtable discussion on challenges and opportunities for preventing, investigating and prosecuting cybercrime using emerging technologies</p> <p>Moderated discussion facilitated by Patrick Cain, APWG.EU</p> <p>Speakers:</p> <ul style="list-style-type: none"> • Maria EIRA, United Nations Interregional Crime and Justice Research Institute (UNICRI) (TBC) • Javier ZARAGOZA, Spanish Constitutional Court • Jonathan POLANKSY, Legal advisor at the Attorney General's Office of Argentina • Hein DRIES, CEO Vigilo Consult and Key Expert for OCWAR-C project • Emre TINAZTEPE, CEO, Binalyze • Pablo LÓPEZ-AGUILAR BELTRAN, Director of Cybersecurity, LOCARD Project / APWG.EU <p><i>Each speaker will have 4' for an initial presentation, followed by a moderated discussion including questions from the audience.</i></p>
16h50	<p>Concluding remarks</p> <p>Patrick CAIN, APWG</p>
17h00	<p>End of the webinar</p>
